Brief information about the program:

- **Fast & Simple multimedia upload to your mobile device.** Oxygen SimpleUp is a handy utility to upload pictures, photos, melodies, ringing tones, music, games and other files from PC to your mobile device. Application lets you to upload content either by using context menu of Windows Explorer or with simple drag-n-drop operation to the SimpleUp window.
- **Almost all modern mobile devices are supported.** You can upload files to mobile phones, smartphones, Pocket PCs, communicators or other mobile devices supporting the OBEX protocol. Oxygen SimpleUp was tested with more than 300 models from Nokia, Motorola, Sony Ericsson, Samsung, LG, HTC, QTek, Toshiba, Panasonic, Sendo and others. Symbian OS smartphones are also supported as well as Windows Mobile devices.
- **Different connection types are supported.** Program can upload files via Bluetooth, infrared or cable connection.
- **Really fast upload process!** Uploading speed is limited by connection type only. You can upload several files at one operation, or you can upload a file to several devices simultaneously.
- **Windows Explorer integration.** Oxygen SimpleUp adds Windows Explorer popup menu item to make uploading process even faster and simpler.
