

## Oxygen Software invites you to join the mobile club

*Oxygen Software which develops the programs for mobile content managing from a personal computer created a club for a mobile related communication. Registration is already open. There are special opportunities for press representatives and beta testers.*

**Moscow, Russia. – January 24, 2007:** Oxygen Software which develops the programs for mobile content managing from a personal computer introduces an informational resource – Oxygen Club, aimed for a mobile related communication. It is supposed that the portal will become a club which unites not only Oxygen Software program users, but people who are interested in mobile phones and the latest technologies. Resource page: <http://club.opm-2.com/>.

The portal contains news section, forums; in the nearest future users will be able to create their own blogs. Besides, registered users have a number of additional opportunities, as follows:

- Special discounts on Oxygen Software products/licenses.
- Access to the latest software builds (for beta testers).
- Preliminary announcements about forthcoming software versions.
- Communication with software developers in an informal atmosphere.
- Exclusive information about Oxygen Software products (for press).

To join the club and have an access to the listed opportunities users should register on Oxygen Club website. Press representatives and program beta testers could choose a special status, which gives specific opportunities.

Oxygen Club website is already functioning in English and Russian, but it is supposed to be multilingual in future.

### About «Oxygen Software»

«Oxygen Software» develops the software for mobile data and settings management from a personal computer. Main company product – content manager Oxygen Phone Manager – is released in several versions (for mobile phones, for smartphones, Forensic version, Lite version). Program products serve both individual and professional aims, besides software for a wide range of users, the company supplies ActiveX libraries for developers (for more information <http://www.smsactivex.com>).
